Experience

Vistar Media

Full Stack Software Developer | November 2017 - Present

- Develop a high-volume ads delivery software to scale out-of-home advertisers and exchange platform
- Implement features including planning and scheduling ads campaign, generating metrics tables, and mailing scheduled reports to group users
- Lead a team of two to redesign a feature for bulk uploading and validating ads campaign's assets
- Increase bulk venues transaction speed by 75% through refactoring server's venues endpoint with Python and PostgreSQL
- Improve the application's load time by 30% through upgrading the existing front end code from Flux to Redux

Oracle Primavera

Software Developer Coop | April 2016 - September 2016

- Developed features for Prime application, including organizing and delivering projects on a cloud platform
- Lead front end for a team of 4 to design and develop a feature to monitor project progress against original and current baselines
- Reduced Scope management page's latency by 400 ms and Prime application's latency by 1900 ms by refactoring the old legacy front end
- Increased code coverage by 63% with qUnit testing for 15 different pages of Prime application

Oracle Primavera

Software Developer Coop | April 2015 - September 2015

- Contributed to the internal libraries by developing panels for project management purpose
- Improved 18% transaction speed by upgrading the system's UI with Javascript and internal libraries
- Reduced the team's defects below 20 by fixing 37% of team's bugs within 3 weeks before the release
- Developed and executed qUnit and manual testing for 8 different pages of Prime application

Skills

Javascript (Typescript, Coffeescript, ES6, React, Redux, Angular2,4, LodashJS, MochaJS, Enzyme, Mockito)

Python (Flask, SQLAlchemy)

HTML5, CSS3 (Bootstrap, Less, Sass, HandlebarsJS)

Java, SQL, PostgreSQL, Matlab, C++

Git, Jenkin, Bazel, Docker, Grunt, Smartbear, Webstorm, Atom, Eclipse, Vagrant

Education

Drexel University

Graduated Cum Laude | September 2013 - June 2017

Bachelor of Science in Computer Science

Projects

RobinTrader (sherwoodfolks.com)

- Developed live stock trader web app for Robinhood accounts
- Interfaces with \$500,000 worth of securities daily
